

Recalling products is an expensive and a worrying prospect for any business. The costs associated with dealing with a product recall either directly or indirectly can be huge therefore can have a real potential to ruin a brand's reputation as well as significantly impacting the balance sheet.

Product recall policies cover the potential fallout of such an event by providing comprehensive cover for your clients' business, whether the event is triggered by a manufacturing error, a product safety issue, or other scenarios such as animal by-product or allergen mislabelling.

WHAT WE DO

- Premises and Product rectification costs
- Loss of future sales
- Ancillary costs
- Comprehensive brand and reputation protection
- Business interruption – loss of gross profit
- Consultant's costs
- Defence costs
